

Quarterly Work Report Analysis: Achievements and Future Strategies

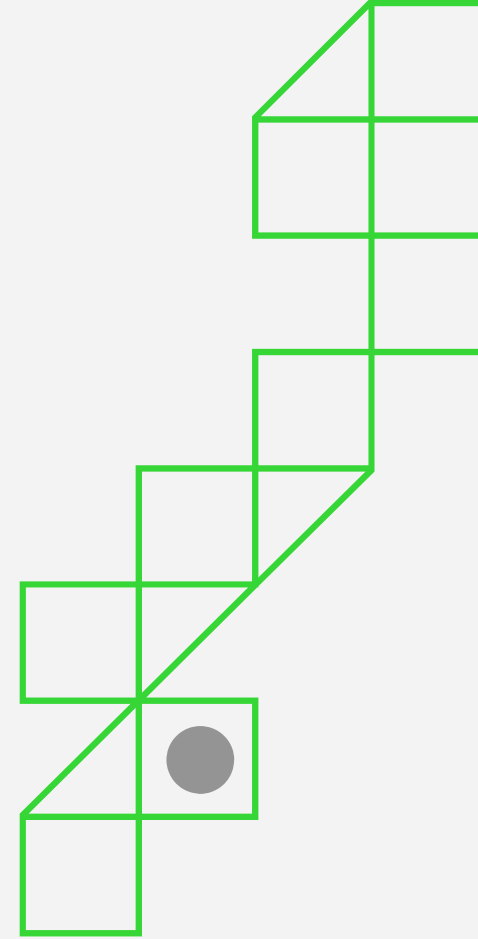

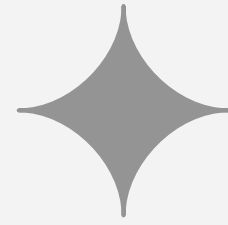

Introduction

Hi everyone, I'm Aman Arora, a software engineer at Your Company. This presentation covers our work in the last quarter, including key projects, achievements, and challenges. We'll explore the progress made, discuss innovations, and highlight goals for the next quarter. Feel free to ask questions at any point. Let's dive into our quarterly report. Thank you for joining!

Quarterly Achievements

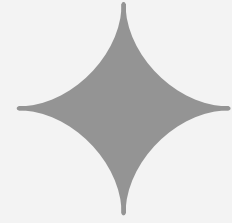

- Delivered the "Question Paper Generation" project, automating exam paper creation.
- Successfully demonstrated the "Question Bank" and "HTS" projects to the client, showcasing their features and benefits.

PROJECTS

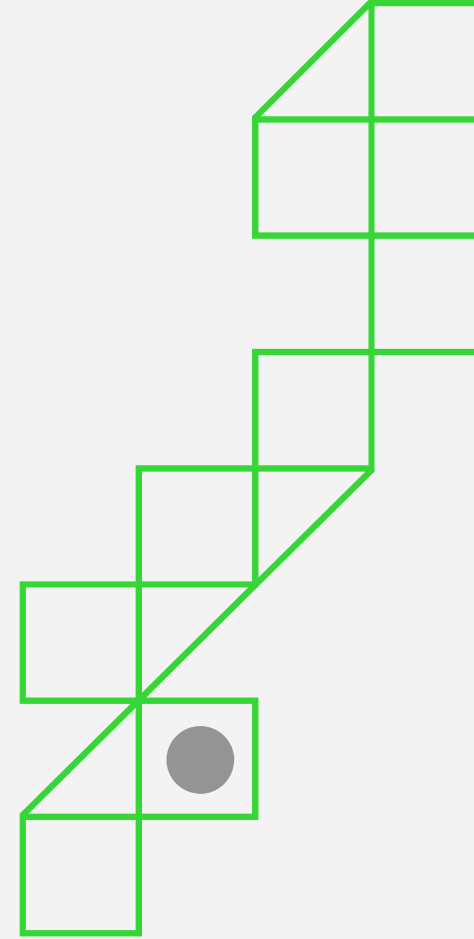

- Question Paper Generation
- Question Bank
- Hybrid Testing System
- Omr Sheet Scanning

Learning

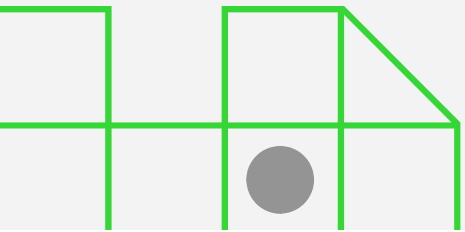

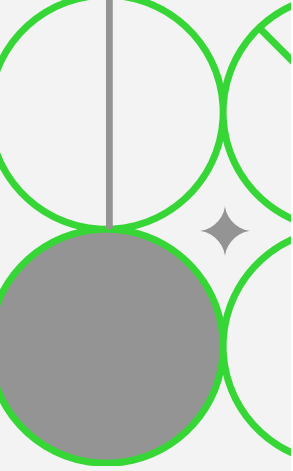

- React Advance Concept
- Java Spring Boot
- Git & Github
- Linux
- Docker
- Azure Deploying

How I Improved Efficiency

To improve efficiency in my role, I streamlined development workflows by automating repetitive tasks and reducing manual efforts. By leveraging data-driven insights, I identified and removed bottlenecks that were slowing us down.

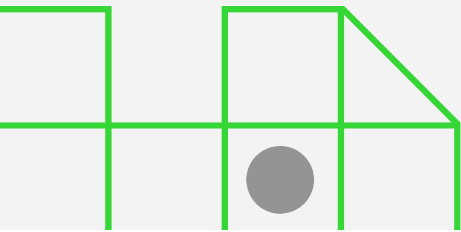

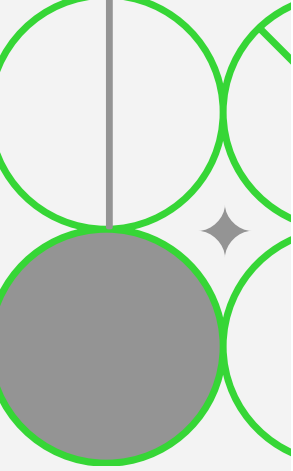

Additionally, I enhanced communication and coordination with my partners to ensure smoother operations. These steps led to quicker project completion times and a more efficient work process overall.

Goals Status

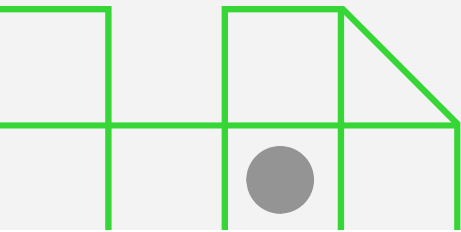

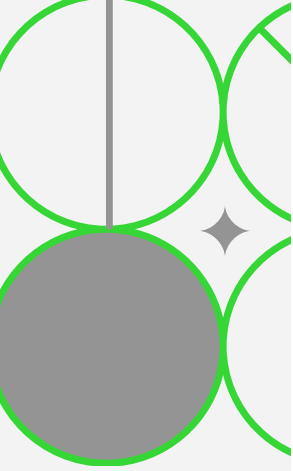

All goals carried forward from the last quarter have been completed successfully. We met our targets and ensured that no outstanding tasks remain. This sets a strong foundation for the upcoming quarter.

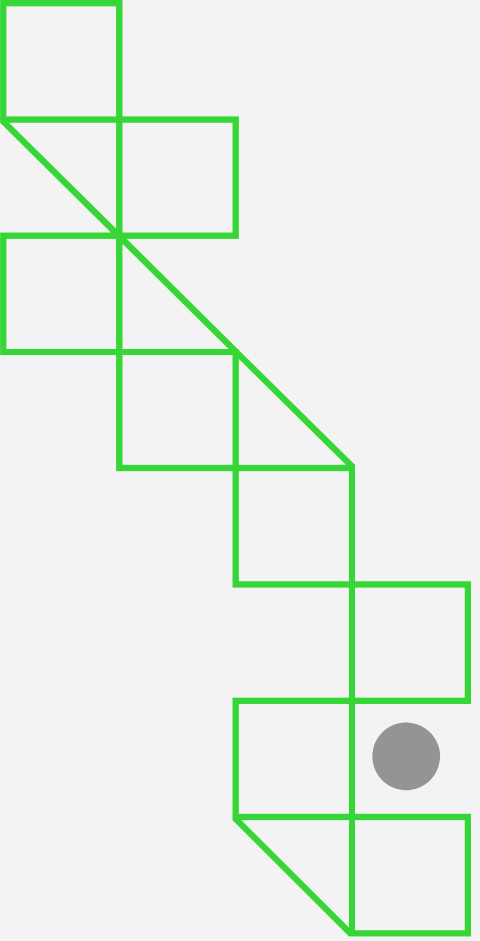

Future Goals

- Promote training sessions and workshops to enhance skills.
- Complete all tasks on time to maintain project schedules.
- Focus on improving the quality of our deliverables through thorough testing and continuous feedback.

Thanks!
